DETAILED ACTION

1. This is the first action on the merits. Claim 1 is pending.

Drawings

2. Figure 1 should be divided into 2 figures. The specification should also be updated for each drawing description.

Claim Objections

3. Claim 1 is objected to because of the following informalities: The "1." Should be deleted. Appropriate correction is required.

Specification

4. The abstract of the disclosure is objected to because of the use of terms which can be implied "improved"; "has been developed". Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

5. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3682

The claim should be numbered. Note that the "1." Is just in the wrong place. It should be placed prior to "A rack and pinion system..."

In line 3, "the rack and the pinion" lack antecedent basis. The preamble states a "rack and pinion system" which provides insufficient basis.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kishi et al. (4,669,328).

Kishi et al. shows a rack and pinion system in figure 1 where a rack (2) has a pivot (3b) at one end and is free to rotate about this pivot to allow the other end to be biased by a spring (5) into engagement with a pinion (1) for the purpose of eliminating backlash (column 2, lines 46-49).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Clark; Parker; Musso; Seed; ('935, '095) show rack and pinion gear systems which address backlash.
